# AGENDA

**Syntex™ Background**

**Syntex™ Key Advantages (USP)**

**Target Market — WHY Syntex™**

**Reports & Certificates**

# Syntex™ Synthetic Latex Exam Gloves

Medical Exam / Dental / Healthcare ; Food Processing ; Industrial

**INTCO MEDICAL Exclusive  
Patented Material Innovation**

**Outperforms Latex  
Outperforms Costs**

**Breaking Natural Latex Boundaries,  
Syntex™ Redefines Glove Quality,  
Safety & Performance**

# Syntex™ — WHAT?

**Revolutionary Patented Ultra-Soft Formula**

Elongation 600%+  
Highly-elastic material reduces fatigue

**Minimal Allergenicity Maximal Safety**

NO sulfur, NO natural latex protein, reducing the Type I allergy risk of natural latex gloves

**Superior Protection ONE FOR ALL**

Exceptional puncture and chemical resistance, ideal for medical and industrial use

**Guard Ecology & Ensure Supply**

Unlike natural latex, Syntex is outside EUDR scope and exempt from EUDR requirements

## Natural Latex Clients

- × Type I allergy exposure — risk to safety, compliance & staff health
- × Supply volatility & high procurement costs of natural latex gloves
- × Barrier shortfalls — limited puncture, oil, chemical, chemotherapy resistance

Alternative with same latex feel & next-level performance — NO retraining, JUST savings  
ALL latex precision, ZERO allergy worry

## Nitrile Clients

- ✓ Seek upgraded solutions, i.e. enhanced softness & overall performance
- ✓ Identify new products to gain increment or capture natural latex market share, e.g. dental still prefer natural latex gloves

## EU Market

- ✓ EUDR has impact on natural latex price and supply stability, seeks proactive risk-mitigation (Syntex is outside EUDR)

# Syntex™ — Reports/Certificates

Medical

Food Contact

PPE / Chemical

QMS Certificate

- ASTM D6319
- EN 455
- ISO 10993

- EU Food Grade Test

- REACH-SVHC
- ROHS

- ISO 9001

# Syntex™ — Reports/Certificates
